INOVASI DAYA SOLUSI

Software Engineer

Desember 2022 - Desember 2023 (1 tahun 1 bulan)

Jakarta, Indonesia

As a Full Stack Developer at Inovasi Daya Solusi, I am responsible for developing and maintaining high-quality web admin applications. I focus on using NextJS and TypeScript to create responsive and user-friendly applications. Additionally, I am involved in the process of analyzing requirements, designing architecture, and testing the application. I started

working at the company in December 2022 and am dedicated to improving product quality through my experience, skills, and knowledge.

I worked as a Fullstack Developer and Team Leader at Nadi Health My role was to develop and maintain web applications and websites, while leading a team of developers and designers. I had the responsibility of ensuring that all projects were completed on time and to the highest quality standards.

I was responsible for managing the development environment and ensuring that the team had the resources and tools necessary to complete their tasks. Additionally, I had to ensure that the projects met all design, functional, and technical requirements. I often had to troubleshoot and debug code, as well as investigate and solve problems with the web applications.
